# **CAPABILITIES**

# Weld Scanning

- Track welds circumferentially or longitudinally with up to six probes.
- Enhance the NAVIC's capabilities with automated, laser-guided weld tracking.

#### Corrosion Mapping

- Perform precision c-scans, line scans, HydroFORM and more with motorized raster arms of up to 1160 mm (45 in) in length.
- Program various scan paths using the remote handheld controller.

#### Tank Inspection

- Deliver state-of-the-art thickness inspection using the actuated probe lift.
- Operate remotely at a distance of up to 30 m (100 ft), controlling probe actuation and crawler steering.

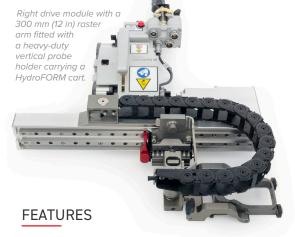

#### 3-Axis Nozzle Scanning

- Utilize a single pod to carry a specialized probe holder around nozzles and fitting welds.
- Receive encoded feedback from the positional, y-axis and skew encoders.

# Medium Temperature Scanning

 Install the optional add-on kit to and allow the NAVIC crawler to operate on inspection surfaces with temperatures up to 150°C (302°F).<sup>1</sup>

# Motorized Driving and Steering

• The handheld controller offers variable drive speed and steering control.

# Low Profile Design

 Radial clearance of 7 cm (2.75 in)<sup>2</sup> and 8.15 cm (3.2 in) on pipes over 20 cm (8 in) OD.

#### Magnetic Wheels

• Operate on vertical, horizontal and inverted ferrous surfaces.

#### Scan Versatility

• Circumferential scanning on pipes as small as 7 cm (2.75 in) OD.

#### Remote Control

 The ergonomic handheld controller includes programing of raster patterns, drive paths and diagnostics.

# Modular

 Crawler module separation, various mounting points and a host of accessories allow one unit to perform many types of inspection.

# Rugged

 Designed to handle intense tasks and challenging environments. (dust-tight, watertight. 3)

# Crawler Weight

• Height:

• 7.7 kg (17 lb)

WEIGHT AND DIMENSIONS

#### **Crawler Dimensions**

Height:<sup>4</sup> 8.1 cm (3.2 in)
Width: 28.2 cm (11.1 in)
Depth: 22.6 cm (9 in)

12.5 cm

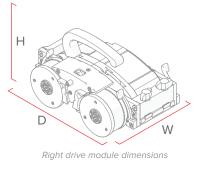

(4.9 in)

# Right Drive Module Weight

• 4.2 kg (9.3 lb)

#### Right Drive Module Dimensions

Height: 12.5 cm (4.9 in)
Height: 8.1 cm (3.2 in)
Width: 13.4 cm (5.3 in)
Depth: 22.6 cm (9 in)

Probes remain centered on the weld with the Tracker's laser guidance. A two probe, pivoting weld frame allows for longitudinal inspection.

> 1. Duty cycling may be required if the ambitemperature is >25°C (77°F).

- Clearance on pipes under 200 mm (8 in) OI
- 3. Not submersible.
- 4. Handles removed.

# **SPECIFICATIONS**

#### Circumferential Pipe Range

• 7 cm (2.75 in) OD to flat

# Longitudinal Pipe Range

• 30.5 cm (12 in) OD to flat

#### Internal, Circumferential Pipe Range

• 61 cm (24 in) ID to flat

## Nozzle Size Range

• 7 cm (2.75 in)

# Radial Clearance<sup>1</sup>

- 7 cm (2.75 in) Pipes under 20 cm (8 in)
- 8.15 cm (3.2 in) Pipes over 20 cm (8 in)

## Vertical Nozzle Clearance

• 23 cm (9 in)

#### Idler Encoder (Right Module)

• 13.78 counts/mm (349.9 counts/inch)

# Motor Encoder (Left Module)

• 872.5 counts/mm (22162.8 counts/inch)

## Y-Axis Encode (Nozzle Application)

• 161.3 counts/mm (4096 counts/inch)

#### Skew Axis Encoder (Nozzle Application)

• 2.84 counts/degrees

#### **Driving Speed**

Variable 0-25 cm/sec (0-10 in/sec)

# Crawler's Vertical Payload

• 10 kg (22 lb)<sup>2</sup>

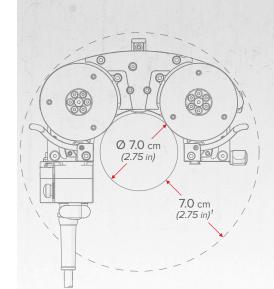

# **Power Requirements**

• 100-240VAC, 50/60Hz, 3.5 Amps

#### Inspection Surface

Ferrous

A NAVIC crawler with a 600 mm (24 in) raster

arm attached. The corrosion thickness probe

NAVIC radial clearance on a minimum pipe diameter

# The Actuated Probe Lift mounted to the swivel mount of

# **ACCESSORIES**

#### Tracker

· Automatically follow a weld profile.

#### Motorized Raster Arm

· Two-axis, automated, corrosion scanning.

#### Backpack

• Carry peripherals on the crawler.

## Pre-Amp Bracket

· Mount pre-amps to the crawler.

#### Motorized Couplant Pump

· Consistent couplant supply.

# Optical Guide

· Guide crawler along welds.

#### **NAVIC Camera Mount**

· Monitor scanner operation.

• European Union CE Declaration -Compliance with essential requirements and provisions of European Union directives.

# **FCC**

• Compliance with Part 15 of FCC rules.

#### Industry Canada

• CAN ICES-3 (A)/NMB-3(A) - This class A digital apparatus complies with Canadian ICES-003.

# **ENVIRONMENTAL SPECIFICATIONS**

# Operating Environment

• -20° C (-4° F) to 50° C (122° F)

# Max. Inspection Surface Temperature

• 150°C (302°F)5

## **Environmental Sealing**

• Dust-tight, watertight<sup>6</sup>

1. Handles removed

- 2. Performance may vary with the surface type. Heavy payloads may
- 3. The backpack is not compatible with older generation NAVIC
- 4. For a complete description of regulatory certifications, contact JIREH.
- 5. The automated crawler medium temperature add-on kit is required when the inspection surface temperature measures between 50°C (122°F) and 150°C (302°F). Duty cycling may be required if the ambient temperature is >25°C

programing, actuated probe lift control and system diagnostics.
